ACERÁLAVA manufactures long stainless-steel products, specializing in round and square bars, rolled and forged (120-500 mm).

Since 2017 ACERÁLAVA is starting to commercialize new ingot sizes in multifaced sections going from 16 to 22 tn gross weight and in round section going from 3 to 4tn gross weight.

Steel shop facilities include an EAF and a AOD converter.

Aceralava has 2 Forging open die presses of 2000 and 3000Tn and a Rolling line. The finishing lines are equipped with different grinding, peeling and polishing machinery.

PRODUCT RANGE

Products	Shapes and types	Description	Size (mm)	Weight (Kgs)
Roundbars		From Ingot casting, Forged/Rolled and peeled Roundbars with reduction ratio and Heat Treated	D : 165 to 600 L : till 8.000	As per starting ingots.
Square Billet		From Ingot casting, Forged/Rolled and grinded Round-corner square billets with reduction ratio	T : 120 to 700 L : till 8.000	As per starting ingots.
Rounds billets		From Ingot casting, Forged/Rolled and grinded Roundbillets with reduction ratio	D : 165 to 600 L : till 8.000	As per starting ingots.
Rectangular Billet		From Ingot casting, Forged/Rolled and grinded rectangular billet with reduction ratio	F : to 650 T : 100 to 300 L : 3.000 - 8.000	As per starting ingots or cut to length
Flat Bars		From Ingot casting, Forged/Rolled and grinded flat bar with reduction ratio	F : 650 T : 70 - 300 L : 3.000 - 8.000	As per starting ingots or cut to length

ACERÁLAVA fabrica productos largos en acero inoxidable, especializándose en barras redondas y cuadradas, laminadas y forjadas (120-500 mm).

Desde el año 2017 ACERÁLAVA está comercializando nuevos tipos de lingotes en sección multicara de pesos entre 16 y 22tn en bruto; y en sección redonda entre 3 y 4 tn en bruto.

La acería incluye un horno eléctrico y un AOD.

Acerálava dispone de 2 forjas libres de 2000 y 3000tn y de un tren de laminación. Las líneas de acabado están equipadas con diferentes maquinarias de descortezado y pelado de las piezas.
